

🚩 Flag 1 – Install Flutter SDK

Objective: Install the Flutter SDK.

Verify:

```
flutter --version
```

Screenshot:

- The results of the command\

```
Command Prompt - flutter --version
Microsoft Windows [Version 10.0.19045.6456]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Student>flutter --version
Flutter 3.35.1 • channel stable • https://github.com/flutter/flutter.git
Framework • revision 20f8274939 (12 months ago) • 2025-08-14 10:53:09 -0700
Engine • hash 6cd51c08a88e7bbe848a762c20ad3ecb8b063c0e (revision 1e9a811bf8) (11 months ago) • 2025-08-13 23:35:25.000Z
Tools • Dart 3.9.0 • DevTools 2.48.0

C:\Users\Student>
```

🚩 Flag 2 – Install Android Studio

Objective: Install Android Studio.

Screenshot:

- Android Studio installed
- SDK Manager opened (or Welcome screen)

🚩 Flag 3 – Install VS Code & Flutter Extension

Objective: Install VS Code and the Flutter (which also installs Dart) extension.

Screenshot:

- Flutter extension installed
- Dart extension installed (or shown as installed)

🚩 Flag 4 – Run Flutter Doctor

Objective: Check whether everything is configured correctly.

Run:

`flutter doctor`

Screenshot:

- flutter doctor results

```
C:\Users\Student>flutter doctor
Doctor summary (to see all details, run flutter doctor -v):
[V] Flutter (Channel stable, 3.35.1, on Microsoft Windows [Version 10.0.19045.6456], locale en-PH)
[V] Windows Version (10 Pro 64-bit, 22H2, 2009)
[X] Android toolchain - develop for Android devices
    X cmdline-tools component is missing.
      Try installing or updating Android Studio.
      Alternatively, download the tools from https://developer.android.com/studio#command-line-tools-only and make sure
      to set the ANDROID_HOME environment variable.
      See https://developer.android.com/studio/command-line for more details.
[V] Chrome - develop for the web
[V] Visual Studio - develop Windows apps (Visual Studio Community 2022 17.11.4)
[V] Android Studio (version 2025.3.1)
[V] VS Code (version unknown)
    X Unable to determine VS Code version.
[V] Connected device (3 available)
[V] Network resources

```

🚩 Flag 5 – Build Your Virtual Device

Objective: Create your first Android Emulator (AVD).

Screenshot:

- Device Manager
- Your newly created virtual device
- Emulator successfully booted

🚩 Flag 6 – Forge Your Project

Objective: Create your first Flutter project.

Run:

```
flutter create my_first_flutter_app
```

Screenshot:

- Successful creation of project

```
PS C:\Users\dominic> flutter create my_first_flutter_app_kinyo
Creating project my_first_flutter_app_kinyo...
Resolving dependencies in `my_first_flutter_app_kinyo`... (1.4s)
Downloading packages...
Got dependencies in `my_first_flutter_app_kinyo`.
Wrote 131 files.

All done!
You can find general documentation for Flutter at: https://docs.flutter.dev/
Detailed API documentation is available at: https://api.flutter.dev/
If you prefer video documentation, consider: https://www.youtube.com/c/flutterdev
```

🚩 Flag 7 – Unlock the Workspace

Objective: Open the project in VS Code.

Screenshot:

- Your project opened in VS Code

🚩 Flag 8 – Launch

Objective: Run your Flutter application.

Run:

flutter run

Screenshot:

- Terminal
- Emulator running
- Default Flutter app

```
PS C:\Users\dominic\my_first_flutter_app_kinyo> flutter run
Connected devices:
Windows (desktop) • windows • windows-x64    • Microsoft Windows [Version 10.0.26200.8875]
Chrome (web)      • chrome • web-javascript • Google Chrome 150.0.7871.187
Edge (web)        • edge   • web-javascript • Microsoft Edge 150.0.4078.105

[2]: Chrome (chrome)
[3]: Edge (edge)
Please choose one (or "q" to quit):
```

🚩 Flag 9 – Find the Entry Point

Figure out where the default Flutter page comes from.

Screenshot:

- The location of the file where the default page is from (the one showing on the emulator)

```
lib > main.dart X
lib > main.dart > MyApp
import package:flutter/material.dart;

2
Run | Debug | Profile
3 void main() {
4   runApp(const MyApp());
5 }
6
7 class MyApp extends StatelessWidget {
8   const MyApp({super.key});
9
10  // This widget is the root of your application.
11  @override
12  Widget build(BuildContext context) {
13    return MaterialApp(
14      title: 'Flutter Demo',
15      theme: ThemeData(
16        // This is the theme of your application.
17        //
18        // TRY THIS: Try running your application with "flutter run". You'll see
19        // the application has a purple toolbar. Then, without quitting the app,
20        // try changing the seedColor in the colorScheme below to Colors.green
21        // and then invoke "hot reload" (save your changes or press the "hot
22        // reload" button in a Flutter-supported IDE, or press "r" if you used
23        // the command line to start the app).
24        //
25        // Notice that the counter didn't reset back to zero; the application
26        // state is not lost during the reload. To reset the state, use hot
27        // restart instead.
28        //
29        // This works for code too, not just values: Most code changes can be
30        // tested with just a hot reload.
31        colorScheme: .fromSeed(seedColor: Colors.deepPurple),
```

🚩 Flag 10 – Claim Your App

Replace the default screen with:

- Full Name
- Course & Section
- "My First Flutter Application"
- Today's Date

Screenshot:

- Your updated content of the code
- The updated UI

```
lib > main.dart > MyHomePage
1 import 'package:flutter/material.dart';
2
3 void main() {
4   runApp(const MyApp());
5 }
6
7 class MyApp extends StatelessWidget {
8   const MyApp({super.key});
9
10  @override
11  Widget build(BuildContext context) {
12    return MaterialApp(
13      title: 'My First Flutter App',
14      theme: ThemeData(
15        colorScheme: ColorScheme.fromSeed(
16          seedColor: const Color.fromARGB(255, 78, 44, 136),
17        ), // ColorScheme.fromSeed
18      ), // ThemeData
19      home: const MyHomePage(title: 'My First Flutter App'),
20    ); // MaterialApp
21  }
22 }
23
24 class MyHomePage extends StatelessWidget {
25   const MyHomePage({super.key, required this.title});
26
27   final String title;
28
29   @override
30   Widget build(BuildContext context) {
31     return Scaffold(
32       appBar: AppBar(
33         backgroundColor: Theme.of(context).colorScheme.inversePrimary,
34         title: Text(title),
35       ), // AppBar
36       body: Center(
37         child: Column(
38           mainAxisAlignment: MainAxisAlignment.center,
39           children: const [
40             Text(
41               'Bryan E. Quiño',
42               style: TextStyle(
43                 fontSize: 26,
44                 fontWeight: FontWeight.bold,
45               ), // TextStyle
46             ), // Text
47             SizedBox(height: 10),
48             Text(
49               '3 - BSIT',
50               style: TextStyle(fontSize: 20),
51             ), // Text
52             SizedBox(height: 10),
53             Text(
54               '08/05/2026',
55               style: TextStyle(fontSize: 18),
56             ), // Text
57           ],
58         ), // Column
59       ), // Center
60     ); // Scaffold
61   }
62 }
```

🚩 Flag 11 – Personalize It

Research and implement at least **three** visual changes.

Examples:

- Change the background colour.
- Change the text colour.
- Centre the content.
- Increase font size.
- Add a border or rounded card.
- Change the font.
- Add an emoji or icon.

Screenshot:

- The code changed for personalizing
- The updated UI

```
import 'package:flutter/material.dart';

void main() {
  runApp(const MyApp());
}

class MyApp extends StatelessWidget {
  const MyApp({super.key});

  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      title: 'My First Flutter App',
      debugShowCheckedBanner: false,
      theme: ThemeData(
        colorScheme: ColorScheme.fromSeed(
          seedColor: const Color.fromARGB(255, 100, 154, 255),
        ), // ColorScheme.fromSeed
      ), // ThemeData
      home: const MyHomePage(title: 'My First Flutter App'),
    ); // MaterialApp
  }
}

class MyHomePage extends StatelessWidget {
  const MyHomePage({super.key, required this.title});

  final String title;

  @override
  Widget build(BuildContext context) {
    return Scaffold(
      backgroundColor: Colors.deepPurple.shade50,
      appBar: AppBar(
        backgroundColor: Theme.of(context).colorScheme.inversePrimary,
        title: Text(title),
        centerTitle: true,
      ), // AppBar
      body: Center(
        child: Card(
          elevation: 5,
          shape: RoundedRectangleBorder(
            borderRadius: BorderRadius.circular(15),
          ), // RoundedRectangleBorder
          child: Padding(
            padding: const EdgeInsets.all(20),
            child: Column(
              mainAxisAlignment: MainAxisAlignment.start,
              children: const [
                Icon(
                  Icons.person,
                  size: 40,
                  color: Colors.deepPurple,
                ), // Icon
                SizedBox(height: 10),
                Text(
                  'Bryan E. Quiño',
                  style: TextStyle(
                    fontSize: 24,
                    fontWeight: FontWeight.bold,
                    color: Colors.deepPurple,
                    fontFamily: 'serif',
                  ), // TextStyle
                ), // Text
                SizedBox(height: 10),
                Text(
                  '3 - BSIT',
                  style: TextStyle(
                    fontSize: 20,
                    color: Colors.black87,
                    fontFamily: 'serif',
                  ), // TextStyle
                ), // Text
                SizedBox(height: 10),
                Text(
                  '08/05/2026',
                  style: TextStyle(
                    fontSize: 18,
                    color: Colors.grey,
                    fontFamily: 'serif',
                  ), // TextStyle
                ), // Text
              ],
            ),
          ),
        ),
      ),
    );
  }
}
```

🚩 Flag 12 – Add an Image

Research how to:

- Create an `assets` folder
- Register assets
- Display an image

Screenshot:

- The steps it took to add an image
- The updated UI
